

Grissom, Young, Picked for First Two-Man Orbit Flight

HOUSTON, Tex. (AP) — Maj. Virgil I. Grissom and Lt. Cmdr. John W. Young were selected today as the astronauts who will pilot the nation's first two-man space flight—a three-orbit Gemini mission late this year.

The back-up crew for the first manned flight of Project Gemini will be Cmdr. Walter M. Schirra Jr. and Capt. Thomas P. Stafford.

Gemini is the intermediate phase of the long-range training

program that has an objective of placing Project Apollo astronauts on the moon within the decade.

Of the four men selected today at the Manned Spacecraft Center, the training base for

astronauts, only Schirra has made an orbital flight.

Grissom made a suborbital flight of 142 miles downrange from Cape Kennedy Sept. 13, 1961, and Schirra followed with a six-orbit mission Oct. 3, 1962.

Young and Stafford, former

test pilots, became astronaut trainees Sept. 17, 1962.

Since the completion of the one-man Mercury flights last year, Grissom has held a primary assignment as coordinator of Gemini affairs with other

members of the astronaut team that now totals 29 pilots.

Schirra, now 41, is the oldest of the original seven Mercury astronauts now that Lt. Col. John Glenn has resigned from the program. Glenn is 42.

Schirra, while concentrating on the Gemini program, has been a coordinator of operations and training.

Young has specialized on the design and development of en-

vironmental control systems, survival gear, pressure suits, couches and other personal equipment. Stafford has specialized on communications, instrumentation and range integration.

"Some people regard private enterprise as a predatory tiger to be shot. Others look on it as a cow they can milk. Not enough people see it as a healthy horse pulling a steed du dragon." — Winston Churchill

32 Students Crowd Into Standard Sedan

LOS ANGELES (AP)—Springtime exuberance pops up in curious ways among youths. United Press International makers of Bolex motion picture equipment has announced three members of the species Homo new entries in the 8mm field sapiens. Here's the latest—and a new zoom lens for the Amid grunts, groans, and sophisticated H-8 Rex gasps for air, the Phi Kappa First, in the camera field. There is the K-2 successor to the popular K-1.

The K-2 is equipped with the Kern Vario-Switar 1:1.9, zoom lens and automatic electric diaphragm control. The focal length of the lens can be varied from 10 to 200 mm. It is operated at speeds 12, 18 and 40 frames per second.

The automatic electric eye shutter is through the lens light measuring and diaphragm control system. This Swiss concern is the Bolex.

The K-2 accommodates ASA ratings S-1, and, at \$250, is considerably less expensive than either the K-2 or the P-3.

The second Bolex offering is the S-1, an electric eye 8mm P.Z. zoom camera which features a power operated and features reflex viewing system, automatic diaphragm control, variable principle shutter and film rewind. It is operated by 8mm to 36mm range.

The P-3 has a Pan Cinar 1:1.9 equipped with a Schneider Vario-Switar zoom lens with a range from 8mm to 36mm and is operated at speeds 12, 18 and 40 frames per second.

The camera utilizes reflex viewing and three timing viewfinders.

The camera boasts seven filming speeds and a variable

shutter. It lists for \$360.

The third camera entry of this Swiss concern is the Bolex

which is the K-2, and, at \$250, is considerably less expensive than either the K-2 or the P-3.

The second Bolex offering is the S-1, an electric eye 8mm P.Z. zoom camera which features a power operated and features reflex viewing system, automatic

diaphragm control, variable principle shutter and film rewind. It is operated by 8mm to 36mm range.

The camera is specifically designed for the hobbyist and home movie maker with operating simplicity its keynote.

Finally, there is the zoom lens introduced for the H-8 Rex big Bertha of 8mm movie cameras.

The new lens is the Vario-Switar 36EE, an F-1.9 optic with a range from 8mm to 36mm.

The lens incorporates automatic diaphragm control, enabling the photographer to focus through the lens with the millions of visitors from around the world.

The camera is operated the proper stop will be automatically selected. Manual diaphragm control is optional.

The 36EE comes with a sunshade lens cap and turret locking cap for proper alignment on the H-8 Rex camera and is priced at \$85.

Further information on any of the Bolex cameras and equipment can be obtained by writing to Paillard Incorporated, 1900 Lower Road, Linden, N.J.

FLIGHT CREWS MAKE LIKE THE ESKIMOS

MONTRÉAL (UPI)—The steward serving cocktails on a flight over the polar routes

knows how to shoot a seal and serve it for dinner, and can

build an igloo if necessary, says

the International Air Transport Association.

IATA says this last skill is

the final test before airline cabin crews are considered qualified to operate aircraft which

regularly cross the pole.

Colossal World's Fair Is Constructed in Swamp

By FRANCIS STILLEY

NEW YORK (AP)—At 9 a.m. April 22 on what once was a swamp and dump heap in jungle deserts and live work Queens Borough, a colossal wonderland four years in the making will be thrown open to the public.

A highlight of the General Electric "Progression" show features a demonstration of rough thermonuclear fission—the first ever to be witnessed by a large audience. A nerve-wracking blast and flash occur after a five-minute introduction as to what's coming.

G.E. also employed the Walt Disney organization to create a "carrousel of progress" which House briefing held by Press Secretary George Reedy and

seats. It employs lifelike and animated human figures to depict home living conditions from the 1880s to the present.

There also will be a "sky-dome spectacular" projected on the inner side of the building's huge dome. This technique much like that of a planetarium is used to demonstrate the vast power of nature's energy sources—lightning storms, star explosions and the sun's heat.

Another moving chair ride at the Bell Telephone pavilion will take the visitor through a series of scenes depicting the history and future of communications joined to display their achievements in science, art, education, religion, philosophy, music and culture.

Some exhibits will carry the visitor back through millions of years of the earth's history. Others will transport him far into the future. Still others will show the foremost of man's works today.

The foreign nations pavilions and displays will be presented in settings typical of their own lands, and will feature their arts, crafts, cuisine and culture.

Thus in a relatively short time the fair visitor figuratively can travel from Hong Kong to Jordan, from India to Indonesia from Trinidad to Thailand.

About half the 50 states are represented, many with extensive displays and programs. The federal government will have one of the largest exhibitions at the fair. It provides a great variety of treats, including what probably will be a highly popular "you are there" journey through the sights and sounds of American history.

The most lavish and expensive of the fair's wonders—all of which will be seen free of charge—have been created by the giants of American industry.

These are such concerns as will be the Hall of Science, featuring many unusual scientific demonstrations; color television production at the RCA exhibition hall; a display of the nation's most powerful rockets at the U.S. Space Park; two million years of man's history at the Travelers Insurance pavilion; and a wide variety of attractions for both young and old at the Better Living Center.

But the most spectacular portions are arranged in the form of "tours" which last 12 to 15 minutes. The spectator will view these from comfortable moving chairs or other vehicles which create a feeling of almost personal, private tours.

In the General Motors "Futura," the visitor will be taken on a simulated trip to the moon to see how man and machine will explore it. On return

to the Ford pavilion visitors will take seats in 1964-model cars for a trip through a "time tunnel," another Disney creation.

The DuPont has employed a combination of live actors and films to be seen on the stage and the same time, to dramatize "the wonderful world of chemistry."

A separate show will feature chemical magic.

The roof of the Eastman Kodak building has been built to simulate the surface of the moon. It was done to provide an unusual background for making pictures.

Other outstanding attractions will be the Hall of Science, featuring many unusual scientific demonstrations; color television production at the RCA exhibition hall; a display of the nation's most powerful rockets at the U.S. Space Park; two million years of man's history at the Travelers Insurance pavilion; and a wide variety of attractions for both young and old at the Better Living Center.

Southern Rhodesia Names Prime Minister

SALISBURY—Southern Rhodesia (AP)—Winston Field resigned today as prime minister of Southern Rhodesia, and British Gov. Sir Humphrey Gibbs named Treasury Minister Ian Smith to succeed him.

Both Smith and Field are members of the conservative Rhodesian Front party, which holds 35 of the 65 seats in the legislature and is pledged to maintain the white minority's rule of the self-governing British territory.

Field, in office since December 1962, lost his party's support because its right wing considered him too moderate. Political circles look for tougher government policies and possibly a declaration of independence from Britain.

CAPITOL STUFF

By TED LEWIS

WASHINGTON — There have been pontifical predictions from Richard M. Nixon and other Republicans that foreign policy will be the key issue in this year's presidential election.

The fact is that the election is more apt to turn on a pipsqueak issue which suddenly captures the public fancy.

At this moment the GOP is being enticed to whomp up the issue of President Johnson's spending on Texas highways on Easter weekend especially as his exploit has been embellished by Time magazine which reported that a cup of beer was handy on the front seat if he wanted it.

Personally we consider that business about the beer is damned offensive. It amounts to a slippery insinuation that the presidency is not a big deal.

President Kennedy once said to a reporter that the presidency is not a big deal. He was drinking very good place to make new friends and so he was trying to hold on to his old friends.

There was great latent wisdom in that terse Kennedy appraisal.

Had he been asked to expand on what he meant, he probably would have declined to do so publicly. Privately he might have said that he could rely on the loyalty of old friends, those intimates of his Senate years, whom he attracted before he ever became a Presidential possibility.

Once in the White House he found it not a very good place to the Rex mansion, and through a Atty. Gen. Bruce Bennett, worked out an arrangement by which the children could return home until the state vs. religion conflict is settled.

Archie T. B. Cude Sr. had three children out of school because the school board insisted they have a smallpox vaccination.

State law requires children to attend school until they reach the age of 16 or complete the eighth grade, ruled Chancellor Wesley Howard of Texarkana.

The Arkansas Supreme Court, upholding Howard's ruling, ordered the State Welfare Department to place the three youngsters in a foster home, vaccinate them, enroll them in school and then take them home.

But Faubus took the children to the Rex mansion, and through

Friday to rescind its order, but it said the children could go home if Howard consented.

Cude vows he will not accept the children if the state vacinates them.

The Cudes have five other children who are too young or too old to be affected by the Arkansas compulsory attendance law.

BRITISH LEADER AILING LONDON (UPI)—Prime Minister Sir Alec Douglas-Home has developed a severe cold.

The 60-year-old prime minister had a lunch engagement in London and one meeting scheduled before he and Lady Douglas-Home were to drive to Chequers for the weekend.

Plan for \$100 Billion Water Diversion Project Reported

By JOHN KAMPS

WASHINGTON (AP) — A \$100 billion idea for carrying water from Alaska and Canada to the Great Lakes for pollution control. This project would take an estimated 30 years. Agreements with Canada and Mexico would have to be worked out in advance.

Chairman Frank E. Moss, D., southward through a system of canals, tunnels and reservoirs, called the Rocky Mountain trench, would extend 500 miles along the mountains north of Montana.

There would be other reservoirs in Idaho, Montana, Nevada, California and Arizona.

Water from the Copper, Yukon, Tanana, Peace and other rivers would be used for electric power generation in Canada and the United States.

Arid areas of the United States would get an estimated 97 million acre-feet of water annually for irrigation. Mexico would get nearly 20 million acre-feet.

The United States would pay about 60 per cent of the project's construction costs. Canada would put up the remaining 40 per cent. Mexico would pay for water it receives.

Moss said the Parsons firm estimates revenues from electric power and water sales would total about \$1 billion annually. Maintenance was estimated at \$400 million a year.

If these estimates are correct, Moss said, the construction cost of the project could be repaid in about 50 years.

Whether or not this proposal is advanced further, whether or not it is ever adopted, we must not be deterred by its size, Moss said. To perform the great task before us we may Midland Bank opening time well need a program as far-sighted as was the Louisiana Purchase, he said.

The Parsons plan, he said, is designed to "assure adequate water supplies for the continent for the next 100 years."

The Neighbors

By George Clark

"The hundreds of cans of dog food I've bought here—and nobody's asked if he's a bird dog, poodle—or what?"

plan for the west, but we must take a close look at how it will affect each region.

Sen. Hiram L. Fong, R-Hawaii, another subcommittee member, said: "We realize our water resources must be developed and conserved to provide multiple uses to meet the needs of growing communities, growing industries, growing recreation purposes."

Redistribution of water would be of great value in Hawaii, just as redistribution of the Yukon waters would be important to Western North America.

Secretary of the Interior Stewart L. Udall said the plan at first glance "may seem grandiose."

"But we may need grandiose projects to meet the nation's water needs in the future," he added.

Reclamation Bureau and Army Engineers may be asked to make a study of the Parsons proposal after it is considered by the Senate Public Works' Select Committee and Interior committees.

The Parsons plan calls for collection of surplus waters of eating. They cannot be brushed away or rinsed away no matter what claims are made by tele-

visions from power and water sales would bring in an estimated \$4 billion annually.

Operation and maintenance costs would run an estimated \$50 million a year.

A major feature would be a canal big enough to handle seagoing ships from Vancouver, B.C., to Duluth, Minn. This would cost probably \$30 billion.

The canal would carry water to Lake Superior and raise the flow through the Great Lakes-St. Lawrence system enough to increase power production at Niagara Falls by 50 per cent, the engineers say.

The imported water also would raise the Great Lakes levels and ease pollution problems in the area, they said.

The canal would extend through Alberta, Saskatchewan, North Dakota and Minnesota. It would provide water along the way for irrigation, municipal and industrial purposes and power generation.

Another spectacular feature they expressed concern over the would be a 500-mile long reservoir called the Rocky Mountain Trench extending northward from Flathead Lake in Montana leaders who ousted President Joao Goulart last week by passed Congress and issued a so-called "institutional act" which suspended political rights and revoked mandates of federal, state and municipal legislation without recourse to courts.

Supplemental water would be collected from drainage areas in the western U.S. including the Clark, Clearwater, Bitterroot, Big Hole, Jefferson, Salmon, Little Colorado, Snake and Escalante basins.

Project plans include a series of power plants in central Idaho and southeastern Washington, along the Clearwater and Clearwater North Fork Rivers and lower reaches of the Snake and Salmon Rivers.

Water from the Rocky Mountain Trench would flow south to Idaho, Oregon, Montana, Utah, Nevada, Arizona, California and the large and Mexican states of Baja, California, Chihuahua and Sonora.

Water from a Pecos River reservoir in New Mexico would be pumped into the Canadian and Pecos Rivers and carried east of the Continental Divide for use in Colorado, New Mexico, Texas, Kansas, Nebraska and Oklahoma.

Police Report Two Sunday Theft Cases

Police this morning reported two theft cases which occurred Sunday.

Joseph Robert Collier, 727 E. Colorado Ave., told officers his full length overcoat was stolen while he was at the Young Men's Social Club, 25 S. Burns Place. Collier said he left the coat with a man he had been drinking with Sunday night and went to the rest room. When he returned, the man had left with the coat.

A battery worth \$30 was stolen from the car of Milton Gilford Ryan Sunday afternoon. Ryan, of 1212 N. Wahsatch Ave., said the car was parked at the rear of his home when the battery was removed from under the hood.

REDEYE: The Army has awarded a contract for production of a bazooka-like guided missile with which it says an infantryman can shoot down low-flying jets.

Called the Redeye, the missile is designed so its warhead

seeks out targets by homing in on the heat generated by their

motors. Called the world's

smallest guided missile, the Redeye weighs less than 30 pounds.

General Dynamics - Pomona, Calif., received the out.

Operation and maintenance costs would run an estimated \$50 million a year.

A major feature would be a canal big enough to handle seagoing ships from Vancouver, B.C., to Duluth, Minn. It would provide water along the way for irrigation, municipal and industrial purposes and power generation.

Supplemental water would be collected from drainage areas in the western U.S. including the Clark, Clearwater, Bitterroot, Big Hole, Jefferson, Salmon, Little Colorado, Snake and Escalante basins.

Project plans include a series of power plants in central Idaho and southeastern Washington, along the Clearwater and Clearwater North Fork Rivers and lower reaches of the Snake and Salmon Rivers.

Water from the Rocky Mountain Trench would flow south to Idaho, Oregon, Montana, Utah, Nevada, Arizona, California and the large and Mexican states of Baja, California, Chihuahua and Sonora.

Water from a Pecos River reservoir in New Mexico would be pumped into the Canadian and Pecos Rivers and carried east of the Continental Divide for use in Colorado, New Mexico, Texas, Kansas, Nebraska and Oklahoma.

REDEYE: The Army has awarded a contract for production of a bazooka-like guided missile with which it says an infantryman can shoot down low-flying jets.

Called the Redeye, the missile is designed so its warhead

seeks out targets by homing in on the heat generated by their

motors. Called the world's

smallest guided missile, the Redeye weighs less than 30 pounds.

plan for the west, but we must take a close look at how it will affect each region.

Sen. Hiram L. Fong, R-Hawaii, another subcommittee member, said: "We realize our water resources must be developed and conserved to provide multiple uses to meet the needs of growing communities, growing industries, growing recreation purposes."

Redistribution of water would be of great value in Hawaii, just as redistribution of the Yukon waters would be important to Western North America.

Secretary of the Interior Stewart L. Udall said the plan at first glance "may seem grandiose."

"But we may need grandiose projects to meet the nation's water needs in the future," he added.

Reclamation Bureau and Army Engineers may be asked to make a study of the Parsons proposal after it is considered by the Senate Public Works' Select Committee and Interior committees.

The Parsons plan calls for collection of surplus waters of eating. They cannot be brushed away or rinsed away no matter what claims are made by tele-

visions from power and water sales would bring in an estimated \$4 billion annually.

Operation and maintenance costs would run an estimated \$50 million a year.

Toastmistress Club Will Dine At Village Inn

The April Meeting of the Pikes Peak Toastmistress Club will be held Thursday at the Village Inn. It will be a dinner meeting at 8:30 p.m. President of the year will be Val Varela.

The Toastmistress, Marion Krauska, will present five subjects on which impromptu speeches will be made by the members. This will be followed by a panel discussion on Duties of Officers, moderated by Sue Cleve. Panel members will be Linda Johnson, Helen Jackson, Esther Springer, Martha MacDonald, Cleve Kosting and Betty Craig.

The general evaluator, Mildred Kight, will sum up the meeting with constructive criticism. Fanette Mead will give a reading speech as part of the advanced training.

Other participants for the evening will be Cleta Kimberlin, invocation; Nell Simpson, timer; Eunice Thiel, Ah-keeper, and Betty Larson, pledge.

Reservations should be made by Monday, to Eunice Thiel, 472-2990. Guests are always welcome and cordially invited to attend.

Local Sorority Members Will Go To Denver Dinner

Alumnae of Alpha Xi Delta Sorority will meet at the Cherry Hills Inn in Denver Saturday for their annual Founders' Day dinner and program.

Alpha Xi Delta was founded at Lombard College, Galesburg, Ill., on April 17, 1893. Colorado alumnae meet once a year for a State Day celebration in honor of this event. This year will mark the 71st anniversary for the sorority.

Those attending from Colorado Springs will be Mrs. Edward B. Foster, Mrs. M. N. Fryman, Miss Helen K. Bailey, Mrs. Clifford K. Gertsch, Mrs. Cecil R. Lyon, Mrs. John E. Stenger, Mrs. Marilyn Hogatt, Mrs. Betty-Jayne Roberts, and Mrs. Quillen A. Cole.

Any newcomers to the Pikes Peak Region who are Alpha Xi Delta alumnae are invited to call Mrs. Roberts at 635-4462 or Mrs. Cole at 635-2001 for information or reservations.

Oak View Club Sponsors USO Hospitality

The second community group to sponsor one of the USO Hospitality Hours will be members of the Oak View Home Demonstration group of El Paso County. These ladies served and presented the brief program at the USO, 211 E. Colorado Ave. from 4 to 5 p.m. Sunday. Home-made cakes and coffee were served. This was an opportunity for service personnel to meet some of the young people in the Pikes Peak Region.

The Oak View Home Demonstration club has as one of its projects, USO wives knitting classes held from 9 to 11:30 a.m. every first and third Tuesday. Any group interested in sponsoring one a year the hospitality program at the USO is asked to contact Elizabeth Dickey, USO Director at 636-5019.

GRAY LADY CAPPING—Mrs. James Luck, one of nine Red Cross Gary Ladies capped this week at the Air Force Academy's 7625th USAF Hospital, receives her cap from Lt. Col. Hilda R. Echols, chief nurse. The ceremony marked completion of training courses for nurses aides, Gray Ladies, and staff aides at the Hospital.

Today's Home

By MARGERY MCLEHENEY

CHICAGO (UPI) — The many features of Outer Drive East, a new apartment on Chicago's lakefront, were incorporated by designers after many talks with women to see what they really wanted in apartments.

Harold R. Blankstein, president of the company that manages the building, listed the preferences. As a result, architects incorporated the following additions:

All kitchens were equipped with stainless steel hoods over the range to trap cooking smoke and odors for dispersion through a vent. Many women had complained of poor ventilation in windowless kitchens because of ducts placed near a ceiling corner rather than near the source of the odor and smoke.

Another complaint concerned the wall section between counter tops and under the ceiling cabinets which soiled easily because of constant counter meal preparation. Ceramic tile walls, easily cleaned with a sponge, were installed.

Another innovation was a gas range on which food cannot burn. The secret is in a motor driven supply of air which controls the cooking process on the stainless steel appliances.

The two-door refrigerator has a no defrosting feature. There are extra lights over the sink and garbage disposals.

Visiting a city? Carry small change for tips.

COFFEE FOR VOLUNTEERS — Shown at a recent coffee for Red Cross volunteers are from left: Capt. C. H. Allen, Ent. AFB Dispensary; Lt. Col. Hilda Echols, Chief Nurse at the AFA Hospital with the Commanding Officer of the hospital, Col. H. C. Green, Jr.; Miss Mary Arnold Hood, Volunteer Chairman of the Pikes Peak Chapter of the American Red Cross; and Lt. Col. Harold W. Mueller of the Ft. Carson Hospital. The coffee was held at the Chap-

ter house in honor of a new group of volunteers undergoing training as Gray Ladies and Nurses Aides. The group is being trained for service at the military hospitals, dispensaries and dental clinics as well as for nursing homes in the local area. This group, long a vital factor in lending a helping hand throughout the Pikes Peak area, will spread to many varied jobs after their training all of them unpaid and providing their own transportation.

Hospital Volunteers

Honored at AFA Ceremony

Capping and recognition ceremonies at the Air Force Academy's 7625th USAF hospital honored 24 volunteers completing training programs and presenting service awards to 25 others.

Lt. Col. Hilda R. Echols, chief nurse, capped 12 nurses aides: Miriam Blair, Celia Diogene, Joan G. Gabriel, Joyce Greear, Juanita Keween, Kay Orlen, Anne K. Pearsall, Lois J. Ryan, Annette F. Wilson, Charlotte L. Anderson, Dorothy Garrow and Deanne E. F. Hind.

Col. Echols also capped Gray Ladies Leah Black, Ruth Woodward, Susan Luck, Kathy Smith, Sharon Rosane, Rosemary Stewart, Peggy Moen, Mary Lewis and Marion Best.

Red Cross volunteer program chairman Mary A. Hood presented certificates and pins to staff aides: Alwyn Hawley, Jane Lodge and Myrtle Willis.

Gray Ladies receiving service awards were: first-year bar, Shirley Neyhart, Sally Peterson, and Bette Ross; second-year bar, Doris Cameron and Terry Cavanaugh; third-year bar, The Catholic Ladies Sodality of the United States Air Force Academy has invited the members of the District Council to hold this quarterly meeting at the Academy. The event is planned for the day will begin with Mass in the Air Force Chapel at 10:30 a.m. with Monsignor Harry E. Hoewischer, chairman of Zebulon Pike Chapter, Daughters of the American Revolution, met Wednesday at the home of Mrs. F. L. Strange for dessert and coffee.

Mrs. Strange presented the program on fine china painting. Mrs. Frank Goldsby was co-hostess.

Members present were Miss Lois Meikle, Mrs. William C. Henderson, Mrs. Herron Folk, Mrs. J. D. Ferguson, Mrs. John J. Murphy, Mrs. Virgil Haskin, Mrs. Earlene Jack, made no later than Monday April 20. Our Lady of Guadalupe, Mrs. Tony Jiron, 635-8525; Holy Trinity, Mrs. George Parks, 633-6736; Our Lady of the Woods, Woodland Park, Mrs. John Konny, 687-9060; Holy Family, Security, Mrs. John J. Sheehan, 392-7977; Corpus Christi, Mrs. William Callandria, 633-6729; Sacred Heart, Mrs. Albert Densmore, 632-0323; St. Mary's, Mrs. John Snyder, 634-5815; St. Paul's, Mrs. William Calvert, 633-9121; Divine Redeemer, Mrs. John E. O'Brien, 632-1785.

Mrs. Hagan is Hostess to Mothers Club

Mothers' Club, Bethel 31 International Order of Job's Daughters, Security, met last week at the home of Mrs. Gene Hagan with Mrs. Pat Whittley as co-hostess. Eighteen members were present at the meeting, attended by the district officers committee chairmen and affiliate presidents.

A large group of members of the Denver Archdiocesan Council will also attend this meeting. The following parish chairmen will accept reservations and help to arrange rides to the meeting at the home of Mrs. F. L. Strange for dessert and coffee.

GAZETTE TELEGRAPH

Your Freedom Newspaper

Ever striving for the Pikes Peak Region to be an even better place to live.

This newspaper is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces, can he develop to his utmost capabilities.

We believe that freedom is a gift from God and not a political grant from government. Freedom is neither license nor anarchy. It is self-control no more, no less. It must be consistent with the truths expressed in such great moral guides as the Golden Rule and the Declaration of Independence.

To The Point

Love Isn't Identical With Sex

By RUSSELL KIRK

Psychologists and college guidance-people are talking a great deal nowadays about the confused search for identity — often unsuccessful — by many young Americans. One way of trying to establish an "identity" seems to be sexual adventure — and usually it leads up a blind alley.

Some sound sense was uttered on this topic recently by Dr. Florence Clothier of Vassar College, addressing the annual meeting in Chicago of the American Orthopsychiatric Association. The monogamous family unit, secured by moral teaching, has been the foundation of American culture, she said. If we believe that this cultural framework is worth preserving as a background for creative development and responsible freedom, parents and teachers are challenged to devise contemporary means of helping young people develop values that will strengthen rather than undermine family life.

But in twentieth-century "sex-saturated society, youth finds itself starved for love," Dr. Clothier went on. "Sex is presented to children as glamor, passion, or sentimental romance, not as part of a warm and fulfilling love relationship." Memorandum of facts on the In other words, the president of the Brotherhood of Railroad Trainmen (AFL-CIO) Accompanying the letter was a five-page statement he called "our economic growth."

The Register was particularly interested to receive a letter from Charles Luna, president of the Brotherhood of Railroad Trainmen (AFL-CIO). Accompanying the letter was a five-page statement he called "our economic growth."

This columnist adds that the gaming and are opposed to true value by collective bargaining where a single individual, by parents of "boy-and-girl relationships" may down into the grades — dating and discussion of their negotia-

tion, it means certain groups from you on the subject under

A few years later, Dr. Clothier adds, "once the barriers of anxiety and reserve have been broken down, competing or making an in-

to tell the men from below. The questions we would like

overcome and an affair has occurred, its repetition can be

step from the casual to the

man produces if it is arbitrarily

promiscuous is a short one will rationally answer questions would like Mr. Luna to tell

which makes the move from who believes in this kind of col-

marital to extramarital re-

lationships easier." And thus

If collective bargaining was wages. If not, where do his

family is degraded, to the on a voluntary basis and they wages come from? If so, how is

imminent peril of all American

non-prudish junior-high school collective bargaining as prac-

ticed, it means certain groups from you on the subject under

teachers have a right to combine to discuss"

the steel firms have been charged. Had they gone to Washington and begged for a law to compel all steel producers to put out steel at a given price, the government would have been happy to cooperate with them.

So, we will contend, that UNLESS the steel people brought in the government and sought to get government help in fixing prices, any supposed efforts on their part to fix prices would come to naught.

The only real conspiracy that has existed is one where some folks seek to invoke force on other people to compel them to behave in a certain way. We can think of nothing more destructive of free enterprise and the right of men to manage their own affairs than to bring legal action against men because that is what they try to do.

Regardless of the outcome in this case, the government is that the steel companies should not be charged with seeking to fix prices unless it can be shown that government was cooperating with them in this effort.

But it is precisely because the government was NOT included in the alleged "conspiracy" that

read tomorrow's editorials.

It is easy to see that in the instant case in which steel companies are being accused of

conspiracy to fix prices, that government is not brought in,

even assuming the charge is a force cannot be successfully applied. Therefore, even though people are no more guilty than it is possible the steel people would have LIKED to see prices fixed, they cannot be fixed without government's cooperation.

We are compelled to conclude

that the steel companies should

not be charged with seeking to

fix prices unless it can be shown

that government was cooperat-

ing with them in this effort.

For a discussion of that

phase of the pricing system,

see tomorrow's editorials.

PTA DEBATE

To the Editor:

Mr. Loren Dunton, president of the Centennial PTA, wrote a typical defense of PTA on April 4 in a letter captioned, "An-

swept PTA Critics."

Apparently Mr. Dunton and the speakers for "state" are not up on their debate techniques, specifically on what constitutes an "answer" or a rebuttal.

Debate judges must weigh the merits of both the affirmative and the negative team and then render a majority opinion.

In this controversy over the democratic process with PTA

aren't we the readers sitting in an analogous position of judgment? We are expected to render a two-thirds majority voice

vote opinion at the state PTA

convention in Fort Collins on impressive array of fact-finders

Tuesday, April 14, at 10 a.m. and dedicated speakers in our

We have had facts quoted to debate, let's look at the opposi-

tions from the proposed by-law. Mr. Dunton presumes that changes by Mrs. Ruth Turner he "answers" critics with such

"March 10, April 5). We have phrases as "these unfounded, had the eight points of the so-unfair, and inaccurate criticalistic platform (national legis-

lative) quoted verbatim as poses that he has defeated the multitudes. Not one fact was cited in his letter to refute

claims of the opposition. Mrs. Robert E. Anderson, first vice

president, Colorado PTA, claims. They haven't made a

real effort" (February 20).

These are not rebuttal

phrases, they are smoke screen words! Dr. Lloyd N. Carson, state PTA publicity director, rose up to defend PTA, "as

completely above board — most democratic in its procedures" (February 20). The smoke screen turns to smog — it hurts my eyes! What are the issues, Dr. Carson?

Mrs. Bill J. Griffith, Arapahoe Council president, on February 25 reported that "the

Big Winner Pays Rent for Neighbors

By THE ASSOCIATED PRESS
LONDON (AP) — Charlie Cooper, the \$23-a-week clerks who won \$650,000 in a soccer pool, has picked up a big check for his neighbors in the Bethnal Green section of London's East End.

Hundreds of people who live on Wilmost Street will be told when they show up at town hall today to pay their week's rent: "Don't bother. Charlie Cooper has paid it for you."

Charlie sent a check for \$4,200 to the Town Council, then ducked away to the country.

The Australian koala bear can live on the leaves of the eucalyptus tree without any other water. It is the only land animal that does not need water to supplement its food.

Three Weapons Are Used In Treatment of Cancer

By Newspaper Enterprise Assn.
Have we made advances in treating cancer?

DR. SCOTT. Surgery, radiation and drugs are the principal ways of treating cancer. I believe we must now look to a combination of all three of these — radiation, surgery and chemotherapy — for further advances in cancer control.

DR. RAVDIN. A study is now under the auspices of the National Cancer Chemotherapy on the effectiveness of radiation before surgery. For instance, there is some evidence that radiation of the lower colon and rectum prior to removal of these areas for extensive cancers provides better future results than surgery alone. I believe that if surgery is done early you can cure cancer that way. The difficulty is that in so many of the people who come for help the cancer has spread beyond the site of origin. In these cases we often need auxiliary therapy. Radiation provides this in one way, but we

believe that certain chemical agents that have been the great value of the sigmoidoscopy examination for examining the rectum and lower large bowel to detect cancer when it occurs. The chemical 5-fluorouracil is small and operable.

DR. SCOTT. Radiography of the breast — or mammography — is a supplemental examination for discovering early lesions and should help us in controlling cancer of this site.

DR. RAVDIN. It requires a great deal of skill on the part of the radiologists.

DR. CLINE. Some advances in operative procedures have been made possible by advances in imaging of the physiological and chemical needs of the patient and how to meet them. There is still some possibility of further improving our surgical methods to some degree.

What about the technique of replacing diseased organs by healthy ones?

DR. RAVDIN. Well, this is being done experimentally, not only in animals but in man.

When we know more about the factors that control prolonged life of these transplants, we will be removing organs to a greater extent. There have been transplants of the lung, the liver, the heart and other organs, but we need to know a good deal more about the factors that control organ transplantation. At present it is largely confined to the type and location and the possible characteristics of the tumor mass within the breast.

Despite all that has been done in breast cancer, deaths from this disease still remain high. Why is this?

DR. RAVDIN. Breast cancer is the leading cause of cancer death among women — some 64,000 women will develop the disease this year. But the picture is not as dark as the mass figures would indicate. Breast cancer is curable when found and treated early before the cancer has spread.

DR. SCOTT. And that's the reason the American Cancer Society encourages women to examine their breasts regularly or to see their doctor at the first symptom or even the suggestion of a lump.

DR. CLINE. I think it would be worth pointing out that the five-year survival rate for localized breast cancer is 82 per cent as against 48 per cent when there is regional spread beyond the original site.

How serious is quackery in cancer?

DR. SCOTT. It's dangerous. Of all cancer sites, prostate is darkest with respect to quackery. Death rates have increased over 70 per cent in men in the last 10 years.

I notice that Dr. Ravidin is smoking a cigar and Dr. Cline is smoking a pipe. Weren't you both cigarette smokers at one time?

DR. RAVDIN. Yes, I was a very heavy cigarette smoker at one time. Now I smoke mostly a pipe or a cigar. There is little evidence that smoking of a pipe or a cigar increases the incidence of pulmonary cancer.

DR. CLINE. I think it would be worth pointing out that the five-year survival rate for localized breast cancer is 82 per cent as against 48 per cent when there is regional spread beyond the original site.

How serious is quackery in cancer?

DR. SCOTT. And that's the reason the American Cancer Society encourages women to examine their breasts regularly or to see their doctor at the first symptom or even the suggestion of a lump.

DR. CLINE. I think it would be worth pointing out that the five-year survival rate for localized breast cancer is 82 per cent as against 48 per cent when there is regional spread beyond the original site.

How serious is quackery in cancer?

DR. SCOTT. It's dangerous.

DR. CLINE. We're making progress. Two of the big killers — cancer of the stomach and cancer of the uterus — have declined dramatically. Uterine cancer deaths have been cut almost 50 per cent in 25 years. We are now able to detect it in the very early stages when it is almost 100 per cent curable. Our hope is that in the near future there will never be a necessity for a woman to die of cancer of the cervix or uterus. Deaths have also dropped — about 40 per cent in the past 25 years.

How do you account for this decline?

DR. RAVDIN. In uterine cancer there are three factors —

more women are having annual health checkups, the increasing use of the Pap test for possible uterine cancer, and improved methods of treatment. The reasons for the sharp drop in stomach cancer are not now clearly known. It is not a worldwide phenomenon. It has taken place in the United States, but it also happens to have a license to practice one of the healing arts very commonly in Japan.

RED MINISTER ARRIVES Americans, British Banned by Cambodia

JAKARTA, Indonesia (UPI)—Communist Chinese Foreign Minister Chen Yi arrived in Jakarta from Peking Friday to attend the 21-nation preparatory meeting for a possible Afro-Asian conference.

The Indonesian Foreign Minister said the dispute between Communist China and Soviet Russia may be debated in the meeting which Soviet Russia is not attending.

PLANE HITS HOME

ZUMA BEACH, Calif. (UPI)—A small, private airplane with four persons aboard hit a home near this Southern California beach community late Sunday and then bounced harmlessly into a vacant lot.

Only the pilot, Charles Lester Ferguson, 30, of nearby Los Angeles, sustained any injuries. He had minor cuts on his lip and forehead. One person was in the house at the time.

PHNOM PENH, Cambodia (AP)—Cambodia's chief of state Prince Norodom Sihanouk has barred all American and British newsmen from his country.

Sihanouk accused them of "virulent attacks and calumny." He objected particularly to Time magazine and the Washington Post.

Britain's Witches Want To Improve Brand Image

By ROBERT MUSEL

LONDON (UPI)—Britain's witches—they still have them over here—want to improve their brand image.

The pretty girl witch is in. Eye of newt and toe of frog Macbeth are out. Smoked salmon sandwiches and vintage wine are in.

The evil eye is out (well, nearly). The 1964 model witches to be whiter than white as against the "black witch of fairy tales" and if she has to stick a pin in an effigy, the pin is likely to be sterilized.

What is more, witches both male and female, are talking about a trade union that would not only make witchcraft respectable but perhaps even profitable.

Only a few months ago witches were shy about revealing their identities because it might cost them their mundane jobs. One male witch threatened to sue if anyone published his connection with a coven's witch's circle in suburban Watford.

But now, witchcraft is suddenly respectable and Britain's witches are anxious to follow the lead of the pioneers who have already explained what they are and what they do in these modern times for the benefit of nationwide television audiences.

What finally brought the witches into the open—after centuries of secrecy because of the torture and execution of hundreds of them in the 16th and 17th centuries—was the recent death of Dr. Gerald Gardner, 80, a witch who took part in the "great curse" on Adolf Hitler.

As Dr. Gardner once told it to UPI, he and all the other witches in Britain linked their "life force" to raise a "cone of power" which prevented Nazi Germany from invading Britain in World War II. He said similar cooperation by witches had wrecked the Spanish Armada in 1588 and thwarted Napoleon's plans to capture London.

Gardner was curator of The Witches' Mill museum on the Isle of Man off the coast of Britain—the only witches' museum in the world—and when his will was probated it set the cauldron bubbling by actually naming the two witches who inherited his estate.

One of them is Mrs. Monique Wilson, high priestess of the covens of Scotland and the other is Mrs. Patricia Crowther, high priestess of the witches of the cities of Sheffield and Manchester.

Neither of these two ladies relished the publicity at first, but openly revealing their identities was part of Dr. Gardner's plan to bring witchcraft out of the shadows and into the light.

Mrs. Leek, who walks around with a pet jackdaw named "Hotfoot Jackson" on her shoulder, said legitimate witches do not take advantage of their powers although she knew some who could cause pain by sticking a pin in an effigy.

Supposing a journalist wrote skeptically about witches ... ouf!

the furtive necessities of the age of persecution.

Mrs. Wilson said somewhat sadly that the fact she would be named as official guide to the Witches Museum had evidently been guessed by some other witches who were jealous enough to resort to evil charms and incantations.

"They cannot harm me," she said defiantly. "I have had my warning and I am protected. Last summer they almost succeeded. I had a heart attack no medical man would explain."

"It was ill-wished and I know what or should I say who caused it. But using power that way means it goes back to the sender threefold. So witches who ill-wish me will themselves be upset."

Since this warning Mrs. Wilson's health has been excellent. Mrs. Crowther said the trouble apparently arose because some witches thought Mrs. Wilson was going to lay claim to a new title — "Queen of the Witches."

"London witches were quite upset about this title business," she said.

She went on television with a London witch, Mrs. Ray Boe, demonstrating ancient rites which include some white magic but nothing that should lead present day Britons to revive burning at the stake—the old penalty.

Another witch, Mrs. Sybil Leek, a motherly 42-year-old antique shop owner who claims to be the high priestess of the New Forest coven, estimated there were 3,000 practicing witches in Britain and she was going to organize them into "The Witchcraft Research Association" to give witches a better public image.

She said offices all over the country would be staffed with witches and she hoped to run bus tours of Britain for witches from other countries.

In the unprecedent discussion the British public learned there are white witches who try to promote love and tolerance and black witches who are not above trafficking with the devil.

Mrs. Leek and the other respectable witches deny there is any sexual element at all in real witchcraft. Orgies, they say, are a comparatively recent development in British witchcraft and one on which the conservative majority turns. Although the rites of covens are secret,

knowledgeable informants claim that outside the nudity and mumbo-jumbo there might be lodge meetings anywhere with sandwiches and wine or coffee winding up the night.

Mrs. Leek, who walks around with a pet jackdaw named "Hotfoot Jackson" on her shoulder, said legitimate witches do not take advantage of their powers although she knew some who could cause pain by sticking a pin in an effigy.

Supposing a journalist wrote skeptically about witches ... ouf!

Rusk Promises Asia Fight Will Be Continued

MANILA (UPI)—Secretary of State Dean Rusk re-dedicated the United States today to leading the Southeast Asia Treaty Organization (SEATO) in fighting Communist aggression.

Rusk said Southeast Asia is fraught with danger and tension and cited the fighting and unrest in Laos and South Viet Nam.

"We have important work to do," he told a meeting of foreign ministers of the SEATO nations.

The three-day conference which opened this morning marks the 10th anniversary of the alliance of the United States, Britain, France, Australia, New Zealand, Thailand, Pakistan and the Philippines.

The war between South Vietnamese government forces and Communist Viet Cong guerrillas, the dispute between Malaysia and Indonesia, and French President Charles de Gaulle's proposal to neutralize most of Southeast Asia were the major items on the conference agenda.

In the longest and strongest opening statement, Thailand's Foreign Minister Thant Khaman denounced De Gaulle's neutrality plan and implied France should withdraw from the alliance if it is unwilling to defend Southeast Asia from communism.

The United States purchased the Virgin Islands from Denmark in 1917 for \$25 million.

FUNERAL COSTS

• Many unsubstantiated accounts of funeral costs have been widespread publicity lately. We are prepared to give you FACTS and answer all queries to your satisfaction.

We have funeral services in every price range and there are NO hidden extras.

Armed Forces News

By STEVE TILLMAN

By STEVE TILLMAN
WASHINGTON — Special to the Air Force. The new Gazette Telegraph — The biters in flight status code III, between a few years ago. These officers, while not required to meet either the proficiency or flight pay requirements, are required to meet the physical standards.

The Air Force Chief of Staff, Gen. Curtis LeMay, due to retire soon, has fired the first gun with a charge that the Army household goods investigators is "wasting money building up the General Accounting of second Air Force." In a recent meeting, they uncovered appearance before the Senate Armed Services Committee.

This was promptly denied by the Army Chief of Staff, Gen. Earle G. Wheeler, who said bluntly that the Army's air capabilities do not and will not duplicate the capabilities of the Air Force.

The Air Force chieftain expressed the opinion that Army Aviation is duplicating Air Force flying-training.

Gen. LeMay brought a new twist into the Pentagon wrangling over funds with his statement that "as a taxpayer, he was against creating another Air Force in the military establishment."

Both sides are wondering if the Secretary of Defense and the President will again try to put the clamps on interservice fighting since this is an election year.

Defense Department has approved a new directive authorizing members of the military to accept the United Nations Medal and Service Ribbon. The authorization applies to those who have served in the United Nations Security Force, Hollandia, the UN Observation Group in Lebanon, the UN Truce Supervision Organization in Palestine, and the UN Observer Group in India.

Reliable Congressional sources say they expect this session of Congress to approve the pending dual compensation bill. It has passed the House and is now awaiting a vote in the Senate. Those informed about dual compensation say that while the pending measure is not what is needed, it does at least open the door to employment of retired Regular officers with the Federal Government. There are no restrictions on similar employment of retired Reserve officers.

The Comptroller General has issued another series of decisions concerning family separation allowances. One important ruling has to do with Servicemen's eligibility to the allowance if he acquires dependents after beginning a permanent change of station. He is eligible in most instances, provided he maintains a home away from his post of duty.

The Armed Forces Leave Act is now under study by the Department of Defense. The department is trying to eliminate some discriminations that now exist in the law. Some enlisted men are on discharge being paid a fixed rate of quarters allowance and subsistence allowances for accumulated leave. This is lower than the going rate and is the 1946 rate. Officers are paid the current rate.

Air Force pilots who have been excused from flying will lose their flight pay if they do not take and pass their annual medical examinations, accord-

ing to the Air Force. The new Gazette Telegraph — The biters in flight status code III, between a few years ago. These officers, while not required to meet either the proficiency or flight pay requirements, are required to meet the physical standards.

Club to Hear About Arabia; King Hussein to Visit Later

By JOHN FETLER
Book Editor

World traveler Grant Butler and said he was happy to see will give a talk about Arabia me again. I found my self to the Knife & Fork Club on comparing King Hussein with April 20, and by coincidence, Gamal Abdel Nasser. The Egyptian Associated Press news dispatch has disclosed that King ed me of a big goodnatured Hussein of Jordan is planning football player, a man whom I was completely at ease to visit the Colorado Springs area April 28.

The coincidence is even more interesting in that Devin-Adair publishers have just published another book by Butler entitled "Beyond Arabian Sands, the people, places and politics of the Arab World."

Butler formerly authored another similar volume entitled "Kings and Camels."

But when Butler's talk to the Knife & Fork Club was arranged there was not the slightest knowledge that in a few days following King Hussein, whom Butler knows personally, is scheduled to visit Colorado Springs area.

It is Butler's feeling that "It is not too late for the Arabs to the Pikes Peak area, to and Jews to reconcile their following an official state visit to differences. These two great United States at Washington, D.C. A spokesman for the offer each other if the bitter king said that following talks and hatred can dissolve into friendship and understanding. I have talked with both Arab and Israeli officials who admit this privately. I have talked with other Arabs and Jews who admit it publicly. But still the impasse continues."

How can America and Americans help these two peoples to resolve their difference? I believe we can begin by being fair to both sides."

There is no indication at the present whether King Hussein plans to make any public statements while on his private visits to the Pikes Peak Region later in the month of April.

A photograph in the book shows Butler in the study of King Hussein, while the author interviews the king, although he had met the king some years ago on a previous occasion during his travels.

This time, Butler recalls

Butler a new volume, "Beyond Arabian Sands," published by Devin-Adair at \$4.95, is an unusually interesting volume especially for those readers who are following the development of world affairs in the Arab segment and who are particularly interested in the problem which some Arabs claim is posed by the state of Israel. It is a reportorial overview of the problems in the Near East.

A photograph in the book shows Butler in the study of King Hussein, while the author interviews the king, although he had met the king some years ago on a previous occasion during his travels.

They will be shown how two countries living in such close proximity can combine their forces, brains, talent and finances contributing toward

the chief of staff.

Three dogs from Denver and one from Pueblo walked off with top honors at the all-age fun-match held by the Colorado Springs Kennel Club Sunday in Black Forest.

Top obedience dog of the show was a miniature poodle owned by Mr. Lewis Grunberg of Denver. The dog chalked up a near perfect score of 197 in Novice A.

Best Junior Puppy in the match was a blonde female Cocker, owned by Miss Maryan Milbourne of Denver. This group was judged by Doug Club of Denver.

Another blonde female Cocker, Spanish, owned by Mrs. Karl Swanson of Denver was judged Best Senior Puppy in the match by Fred Higel.

Best Open Dog in the match was a German Shepherd, owned by Mrs. Jean Womington of Pueblo. This group was also judged by Fred Higel of Denver.

It shows the boy going today by Director Francis H. Wilmer of the Census Bureau regional office at Denver.

Information furnished by location this Fall, may result in a

retarded child film to be shown here.

The El Paso County chapter

for Retarded Children, Inc., an

ounces an unusual movie as

the program for its meeting at

8 p.m. on Wednesday evening at the First Congregational Church.

Filmed at Selinsgrove Pa.

State School and Hospital the

movie is called "The Toymakers" and tells the story of a

teen-age retarded boy who is

being educated in the hospital

to take a job in the outside

world.

It shows the boy going

today by Director Francis H.

Wilmer of the Census Bureau

and also points out the

hospital's other retarded resi-

dents in particular, the toy-

makers elderly men who have

spent most of their lives in in-

stitution.

Since today's thinking is that

the large majority of mentally

retarded are better off out-

side institutions, if possible, liv-

ing with their families, the new

role of the state training schools of the Junior Showmanship

Class.

One hundred and ninety-two

dogs were entered in the show.

They came from Colorado

Pueblo, Denver, Gold-

en, Littleton, Black Forest,

the Monument and Englewood, Colo-

rodo.

They were in other words

being discourteous or disre-

garding the rights of others in

their use of the roadways. Add

to this figure the number of

discourteous drivers also on

the highway at the same time

and there is nothing surprising

in the death toll."

Carrel cited figures showing

that in practically all the traffic

fatalities either the driver

the pedestrian—or both—was

violating a traffic law or a safe

practice. In any event, according

to Carrel, bad motor manners are involved.

Dr. Stevens brought as his guest Bo King whom he signed up this

past week and Dr. Green's guest was Fred Watrous. Both new mem-

bers plan to devote as much time as possible to increase the total

number of members for the Colorado Springs Chamber of Commerce.

Hawks Even NBA Series Playoff

By MIKE RECHT

Associated Press Sports Writer

ST. LOUIS (AP)—The St. Louis Hawks did everything right and the San Francisco Warriors did everything wrong Sunday night in the National Basketball Association playoffs and the score showed it.

St. Louis 123, San Francisco 95

Warriors' Coach Alex Han-

num summed it up: "There's

just isn't much you can do in a

game like that."

The outcome sent the clubs

back to San Francisco to settle

the Western Division best-of-

seven final set Thursday. Each

team has three victories.

The winner meets Boston, the

Eastern Division playoff cham-

pion, in another best-of-seven

series for the NBA title.

America's Top Skier, Werner Killed in Race With Avalanche

Mizzou, Sooners Net Three-Game Sweeps

By JIM VAN VALKENBURG

Associated Press Sports Writer

ST. MORITZ, Switzerland (AP)—Buddy Werner, the hard-luck American ski star, lost a desperate race with an avalanche Sunday and was killed under tons of snow.

The 28-year-old Olympian was taking part in the filming of a ski fashion movie with other top skiers when the wet snow snow thundered down an Alpine slope at Samaden, a village two miles outside of this winter resort.

The avalanche also killed Barbara Henneberger, 23, one of West Germany's top women skiers. Fifteen others in the group dug themselves out or were freed by rescuers.

It was a nightmare," said Fritz Wagnerberger, 27, a veteran German racer.

Miss Henneberger's body was found in eight feet of snow three border.

Werner, whose first name was

Regent of CU Is Accused of Drunken Driving

DENVER (AP) — University One of the witnesses to the of Colorado Regent Charles D. incident was Dist. Judge Rob- (Jim) Bromley was charged after P. Fullerton. with investigation of drunken Bromley, who has announced driving Sunday night.

Police reported that Bromley's car had hit a parked auto-cent on a Breathalyzer exam- mobile, two trees, some bushes in front to determine his sobriety, and then crashed into the east end. Police said that 15 per Denver home of Victor Zall, cent is the legal determination of the Denver City Atty. Max for considering a driver under Zall.

I Remember

BY CHARLES S. DUDLEY

I don't know whether it was an act of gallantry on my part or whether I was just showing off when one time I tangled with a rattlesnake on Mount Wilson, near Pasadena, California, and got laid up with a sprained ankle.

I was working on a Los Angeles newspaper and having asthma so bad that when my vacation came I rode a mule up the Mt. Wilson trail to a little hotel on the summit next to the Carnegie observatory there. In that high place I was free from asthma and had an opportunity to see the observatory instruments and had a look at the moon through the 60-inch reflecting telescope.

But I was sitting in one of a number of chairs with some girls at the top of a six-foot wall when down on a path at the bottom of the wall we observed that beautiful rattlesnake. It was leisurely making its way along the path. The girls let out a little scream, and I seized a broken chair leg that lay on the wall and jumped over to do battle like a knight of the Round Table with that rattlesnake. It was really a formidable enough one to be an adversary.

Trouble came when I landed on the path beside it. My left ankle turned and the pain was so acute that at first I thought the snake had bitten me. But I made a pass at the reptile with the short chair leg. I missed hitting its tail as it vanished in the interstices of the dry rock wall.

Though I had cut but a poor figure in my act of derring-do the girls were most considerate of me. They applied some medication to my injured ankle and bound it up. But it swelled rapidly. Finally a woman at the hotel who was a nurse told me I had better go down to Los Angeles and see a doctor.

This I decided to do. A man at the hotel made me a crutch out of a pie handle, and another one tied a board across the saddlebow of a mule they had brought around and helped me onto its back, tying my foot to the board so that it stuck up in the air.

On the Democratic side this week are a convention in North Dakota beginning today and the Illinois primary.

North Dakota has 16 votes in the Democratic convention.

Illinois has 114; 48 will be chosen in Tuesday's primaries.

Most are expected to support President Johnson.

34 Delegates Are Chosen for GOP Convention

BY LARRY OSIUS

WASHINGTON, D.C.—The tempo of delegate selection for the Republican National Convention is speeding up. Thirty-four were chosen over the weekend and at least 73 will be picked this week.

Sen. Barry Goldwater of Arizona, who now has 109 first-ballot votes in eight states, and Sen. Margaret Chase Smith of Maine will test their popularity in Tuesday's Illinois presidential preference primary.

Their names are the only ones printed in the preference spot on the Republican ballots.

Results are not binding on delegates to the national convention. Forty-eight district delegates will be chosen Tuesday with 10 at large delegates to be picked in the Illinois Republican state convention next month.

Of the 78 persons running for the Illinois GOP delegate posts, 34 favor Goldwater, 3 are for former Vice President Richard M. Nixon and one is for Gov. Nelson A. Rockefeller of New York.

The rest, too, The Associated Press were uncommitted or they made no replies.

Three states complete their selection of delegates to the Republican convention at state conclaves Saturday—Arizona, Kansas and Louisiana.

Goldwater is expected to win Arizona's 16 votes. He already has 16 Louisiana district delegates and the four at-large delegates to be named Saturday may be instructed to vote him, too.

In Kansas, Gov. John Anderson Jr. has been battling for an uncommitted delegation. So far six district delegates are instructed or favorable to Goldwater; nine are uncommitted. Five more will be chosen Saturday to round out Kansas' 20-vote delegation.

On the Democratic side this week are a convention in North Dakota beginning today and the Illinois primary.

North Dakota has 16 votes in the Democratic convention. Illinois has 114; 48 will be chosen in Tuesday's primaries.

Most are expected to support President Johnson.

Newsman Hits Proposal for Conduct Code

BOULDER, Colo.—Ed Lehman, editor and publisher of the

Longmont Times-Call, disputed put a bandage tightly around my ankle and told me to go to a newspaper office to have a code of conduct like lawyers' bandage on it, in hot water and judges.

When a judge steps out of office it again when necessary line, he can be imprisoned which I did, wheezing with asthma. Dist. Judge Mitchell B. Johnson. It was even a week after said: "When a lawyer steps out the end of my vacation before I of bounds, he can be disbarred."

He said a similar restriction should be placed on newspaper reporters.

Lehman replied that the public acts for the journalist in the way that a bar association acts trying to kill the blasted paper with a short chain leg. But if it is biased, the public will soon know it and the reporter's paper will soon be in serious trouble if something isn't done about it.

The discussion took place at the Colorado Newspaper Conference sponsored by the University of Colorado.

At the concluding sessions today topics include the news handling of juvenile crime and other newspaper policies.

Lawrence G. Fanning, executive editor of the Chicago Daily News, predicted in the annual Ralph L. Crosman Memorial Lecture Friday night that newspapers soon will deliver their product as rapidly as television does.

The newspaper now faces a frightening gap between the future and its own archaic methods," Fanning said.

The Chicago editor said that by 1974 many newspapers will have an extensive network of TV screens in their newsrooms, magnetic tape files with electronic request apparatus and instant recall of all copy written in the past.

Automation is built inextricably into the future of newspapers, Fanning asserted.
